Sequence 872, Application US/09640211A

Patent No. 6833446

GENERAL INFORMATION:

APPLICANT: Wood, Marion
APPLICANT: Shenk, Michael A.
APPLICANT: Shenk, Michael A.
APPLICANT: McGrath, Annette
APPLICANT: McGrath, Annette
APPLICANT: McGrath, Matthew
TITLE OF INVENTION: Compositions and Methods for the
TITLE OF INVENTION: Modification of Gene Transcription
FILE REFERENCE: 11000.1021C1U
CURRENT APPLICATION NUMBER: US/09/640,211A
CURRENT FILING DATE: 2000-08-16
NUMBER OF SEQ ID NOS: 2368
SOCTWARE: FSatSEQ for Windows Version 4.0
SEQ ID NO 872
LENGTH: 102
TYPE: PRT
ORGANISM: Eucalyptus grandis

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   in cold stress response.
SUBCELLULAR LOCATION: Nucleus (Probable).
INDUCTION: By cold stress.
MISCELLANEOUS: Arabidopsis plants overexpressing MYB4 sl
phenotype and increased tolerance to cold and freezing.
SIMILARITY: Contains 2 Myb DNA-binding domains.
CAUTION: Ref.4 sequence differs from that shown due to frameshift in position 138.
